Journal of Hydrology, 48 (1980) 385—394
Elsevier Scientific Publishing Company, Amsterdam — Printed in The Netherlands

Subject Index Volumes 45—48

The first figure in columns 2 and 4 indicates the volume number, the second the issue number, and the third the page number.

absolute age *see also* isotopes

absolute age—dates
ground water: ^{14}C ages of confined groundwater from the Gwandu Aquifer, Sokoto Basin, northern Nigeria
(Geyh, M. A., *et al.*) 48(3-4): 281-288

Africa *see also* Nigeria; South Africa

Africa—hydrogeology
ground water: Chemical composition of groundwaters in the vast Kalahari flatland
(Mazor, E., *et al.*) 48(1-2): 147-165

aquifers *see under* ground water

Asia *see also* India

Atlantic Ocean *see also* Bermuda

Atlantic Ocean—oceanography
ocean circulation: Study of the effect of ocean tides on a coastal carbonate aquifer in the Miocene of Algarve, Portugal
(Razack, M., *et al.*) 45(1-2): 57-69

Australia *see also* New South Wales; Victoria

automatic data processing—engineering geology
algorithms: A generalized approach to kinematic flood routing
(Smith, A. A.) 45(1-2): 71-89

automatic data processing—hydrogeology
computer programs: Calculation of water balance in the crop root zone by computer
(Sarma, P. B. S., *et al.*) 45(1-2): 123-131
hydrology: A descriptive model of the relationship between rainfall and soil water table
(Rennolls, K., *et al.*) 47(1-2): 103-114
— Land-use hydrology; Shoalhaven, New South Wales
(Aston, A. R., *et al.*) 48(1-2): 71-87
— Rainfall interception in a forest stand estimated from grassland meteorological data
(Pearce, A. J., *et al.*) 46(1-2): 147-163
— Stochastic generation of temperature and solar radiation data
(Nicks, A. D., *et al.*) 48(1-2): 1-17
models: Hydrology of small oceanic islands; utility of an estimate of recharge inferred from the chloride concentration of the freshwater lenses
(Vacher, H. L., *et al.*) 45(1-2): 21-37

Bermuda—hydrogeology
hydrology: Hydrology of small oceanic islands; utility of an estimate of recharge inferred from the chloride concentration of the freshwater lenses
(Vacher, H. L., *et al.*) 45(1-2): 21-37

biography—general
Hurst, Harold Edwin: H. E. Hurst, D.Sc., C.M.G. (1880-1978)
(Cole, J. A.) 46(1-2): 1-3

book reviews—environmental geology
title: Environmental isotope data No. 6; world survey of isotope concentration in precipitation (1972-1975); book review
(Gaspar, E.) 45(1-2): 161-162
— Scientific aspects of the 1975-76 drought in England and Wales; book review
(Fleming, P. M.) 45(1-2): 162-163

book reviews—hydrogeology
title: An evaluation of shallow groundwater movement in a small boulder clay catchment in Holderness; book review
(van der Molen, W. H.) 47(1-2): 195
— Clean water; what we should know about it; book review
(Calembert, L.) 48(3-4): 379-380
— Contemporary hydrogeology; book review
(Neuman, S. P.) 48(3-4): 377-378
— Groundwater; book review
(Davis, G. H.) 47(1-2): 193
— Groundwater hydraulics; book review
(Kazmann, R. G.) 48(3-4): 375-376
— Hydrodynamics of lakes; proceedings of a symposium; book review
(Foster, D. N.) 48(3-4): 376-377
— Isotope hydrology 1978; book review
(Davis, G. H.) 47(1-2): 195-196
— Lakes; chemistry, geology and geophysics; book review
(Picard, M. D.) 45(1-2): 159-160
— Seepage and groundwater; book review
(Neuman, S. P.) 47(1-2): 194-195

0022-1694/80/0000—0000/$02.50 ©1980 Elsevier Scientific Publishing Company

book reviews—hydrology
title: Water, a comprehensive treatise; Vol. 6, Recent advances; book review
(Andersen, H. C.) 48(3-4): 378-379

book reviews—soils
title: Simulation field water use and crop yield; book review
(Youngs, E. G.) 45(1-2): 160-161

brines *see also* bromine

bromine—isotopes
Br-82: A note of the performance of A ^{82}Br radioactive tracer in the River Skerne, England
(Hamill, L.) 47(3-4): 307-315

Canada *see also* New Brunswick; Northwest Territories; Nova Scotia

Colorado—hydrogeology
hydrology: Effective and bankfull discharges of streams in the Yampa River basin, Colorado and Wyoming
(Andrews, E. D.) 46(3-4): 311-330

conservation *see also* reclamation

deuterium *see also* hydrogen; tritium

deuterium—isotopes
D/H: Mixing models and ionic geothermometers applied to warm (up to 60°) springs; Jordan Rift valley, Israel
(Mazor, E., *et al.*) 45(1-2): 1-19

diagenesis *see also* sedimentation

Eastern Hemisphere *see also* Africa; Atlantic Ocean

engineering geology *see also* geologic hazards; geophysical methods; ground water

England—economic geology
water resources: Factors affecting cost optimisation of groundwater development schemes for river regulation
(Birtles, A. B., *et al.*) 48(3-4): 197-219

England—environmental geology
pollution: Movement of water and nitrate in the unsaturated zone of upper Chalk near Winchester, Hants., England
(Wellings, S. R., *et al.*) 48(1-2): 119-136
— The interpretation of tritium in the Chalk unsaturated zone
(Foster, S. S. D., *et al.*) 46(3-4): 343-364
— The spatial dimension in the interpretation of stream solute behaviour
(Walling, D. E., *et al.*) 47(1-2): 129-149

England—hydrogeology
hydrology: A note of the performance of A ^{82}Br radioactive tracer in the River Skerne, England
(Hamill, L.) 47(3-4): 307-315
— Chemical yields in runoff, and denudation in a small arable catchment, East Devon, England
(Foster, I. D. L.) 47(3-4): 349-368
— Rainfall interception in a forest stand estimated from grassland meteorological data
(Pearce, A. J., *et al.*) 46(1-2): 147-163
— The chemistry of the River Wye
(Oborne, A. C., *et al.*) 45(3-4): 233-252

environmental geology *see also* geologic hazards; reclamation

Europe *see also* the individual nations

floods *see under* rivers and streams *under* hydrology

Florida—economic geology
water resources: Use of Landsat data to improve the water budget computation in Lake Okeechobee, Florida
(Shih, S. F.) 48(3-4): 237-249

Florida—geophysical surveys
remote sensing: Use of Landsat data to improve the water budget computation in Lake Okeechobee, Florida
(Shih, S. F.) 48(3-4): 237-249

fossils *see* appropriate fossil group

geochemistry—processes
data: Kinetics of chemical processes in a carbonate aquifer; a case study of water-rock interaction in the aquifer of western and central Galilee (Israel)
(Nadler, A., *et al.*) 45(1-2): 39-56

geochronology *see also* absolute age

geologic hazards—floods
prediction: On the occurrence and importance of Paretian-tailed distributions in hydrology
(Ochoa, I. D., *et al.*) 48(1-2): 53-62
probability: Regional drought and flood frequency analysis; theoretical consideration
(Sen, Z.) 46(3-4): 265-279
simulation: A generalized approach to kinematic flood routing
(Smith, A. A.) 45(1-2): 71-89

geomorphology—fluvial features
drainage basins: Chemical and sediment mass transfer in the Godavari River basin in India
(Bikshamaiah, G., *et al.*) 46(3-4): 331-342
— Effective and bankfull discharges of streams in the Yampa River basin, Colorado and Wyoming
(Andrews, E. D.) 46(3-4): 311-330
floodplains: Welsh floodplain studies; II, Application of a qualitative inundation model
(Lewin, J., *et al.*) 46(1-2): 35-49

geomorphology—processes
denudation: Chemical yields in runoff, and denudation in a small arable catchment, East Devon, England
(Foster, I. D. L.) 47(3-4): 349-368

geomorphology—solution features
karst: Karstic spring recession hydrograph and water temperature analysis; Oymapinar Dam Project, Turkey
(Karanjac, J., *et al.*) 45(3-4): 203-217

geophysical methods—electrical methods
resistivity: An automatic electrical resistance soil-moisture measuring system
(Williams, T. H. L.) 46(3-4): 385-390

geophysical methods—radioactivity methods
interpretation: The effect of snow drifting on gamma snow survey results
(Cork, H. F., *et al.*) 48(1-2): 41-51
techniques: The measurement of suspended sediment transport in natural streams using automatic radioisotope gauges
(Tazioli, G. S.) 47(1-2): 173-185

geophysical surveys *see also* geophysical methods

glacial geology *see also* geomorphology

Great Britain—engineering geology
reservoirs: Reservoir effects on sediment yield
(Grimshaw, D., *et al.*) 47(1-2): 163-171

Great Britain—hydrogeology
hydrology: Comparative estimates of interception loss from three coniferous forests in Great Britain
(Gash, J. H. C., *et al.*) 48(1-2): 89-105

ground water *see also* hydrology

ground water—aquifers
models: A finite-element model for concurrent confined-unconfined zones in an aquifer
(Elango, K., *et al.*) 46(3-4): 289-299
— Aquifer response to forecasting inputs
(Rushton, K. R., *et al.*) 48(1-2): 167-183

ground water—geochemistry
hydrochemistry: Effect of climate and temperature on the amount of HCO_3^- and H_2CO_3 in ground water
(Schoeller, H. J.) 46(3-4): 365-376

ground water—hydrodynamics
experimental studies: Dispersivity and velocity relationship from laboratory and field experiments
(Klotz, D., *et al.*) 45(3-4): 169-184
models: A perturbation solution of the nonlinear Boussinesq equation; the case of constant injection into a radial aquifer
(Babu, D. K., *et al.*) 48(3-4): 269-280
— A predictor-corrector alternating-direction implicit method for two-dimensional unsteady saturated-unsaturated flow in porous media
(Hornung, U., *et al.*) 47(3-4): 317-323
— Evaluating hydrodynamic dispersion coefficients
(Gupta, S. K., *et al.*) 47(3-4): 369-372
— Interpretation of recession flow
(Anderson, M. G., *et al.*) 46(1-2): 89-101
— Radial dispersion to an abstraction well; discussion and reply
(Zuber, A., *et al.*) 47(3-4): 373-376
— Regional groundwater motion in response to an oscillating water table
(Vandenberg, A.) 47(3-4): 333-348

ground water—levels
evaporation: Evaporation from vegetation in landscapes developing secondary salinity using the ventilated-chamber technique; II; Evaporation from Atriplex plantations over a shallow saline water table
(Greenwood, E. A. N., *et al.*) 45(3-4): 313-319
models: A descriptive model of the relationship between rainfall and soil water table
(Rennolls, K., *et al.*) 47(1-2): 103-114
— Response functions applied to a drainage system
(Sharma, T. C.) 45(3-4): 279-287

ground water—models
mathematical models: Analysis of hydrological recession curves; discussion
(Martinec, J.) 48(3-4): 373

ground water—recharge
models: On subsurface drainage of transient recharge
(Singh, R. N., *et al.*) 48(3-4): 303-311

ground water—salt-water intrusion
anomalies: Differing positions of saline interfaces in aquifers and observation boreholes
(Rushton, K. R.) 48(1-2): 185-189
— Differing positions of saline interfacies in aquifers and observation boreholes; discussion
(Kohout, F. A.) 48(1-2): 191-195

ground water—surveys
Africa: Chemical composition of groundwaters in the vast Kalahari flatland
(Mazor, E., *et al.*) 48(1-2): 147-165
Bermuda: Hydrology of small oceanic islands; utility of an estimate of recharge inferred from the chloride concentration of the freshwater lenses
(Vacher, H. L., *et al.*) 45(1-2): 21-37
England: Factors affecting cost optimisation of groundwater development schemes for river regulation
(Birtles, A. B., *et al.*) 48(3-4): 197-219
— Movement of water and nitrate in the unsaturated zone of upper Chalk near Winchester, Hants., England
(Wellings, S. R., *et al.*) 48(1-2): 119-136
— The interpretation of tritium in the Chalk unsaturated zone
(Foster, S. S. D., *et al.*) 46(3-4): 343-364

Gwandu Aquifer: ^{14}C ages of confined groundwater from the Gwandu Aquifer, Sokoto Basin, northern Nigeria
(Geyh, M. A., *et al.*) 48(3-4): 281-288
India: Estimation of recharge to the phreatic aquifers of the lower Maner Basin, India, by using the titrium injection method
(Athavale, R. N., *et al.*) 45(3-4): 185-202
Israel: Kinetics of chemical processes in a carbonate aquifer; a case study of water-rock interaction in the aquifer of western and central Galilee (Israel)
(Nadler, A., *et al.*) 45(1-2): 39-56
— Mixing models and ionic geothermometers applied to warm (up to 60°) springs; Jordan Rift valley, Israel
(Mazor, E., *et al.*) 45(1-2): 1-19
Mexico: Environmental isotopes in a study of the origin of salinity of groundwater in the Mexicali Valley; discussion
(Durazo, J., *et al.*) 47(3-4): 391-392
Portugal: Study of the effect of ocean tides on a coastal carbonate aquifer in the Miocene of Algarve, Portugal
(Razack, M., *et al.*) 45(1-2): 57-69

hydrogen *see also* deuterium; tritium

hydrogen—isotopes

D/H: Mixing models and ionic geothermometers applied to warm (up to 60°) springs; Jordan Rift valley, Israel
(Mazor, E., *et al.*) 45(1-2): 1-19

hydrogeology *see also* ground water; hydrology

hydrology *see also* ground water

hydrology—atmospheric precipitation

rainfall: A descriptive model of the relationship between rainfall and soil water table
(Rennolls, K., *et al.*) 47(1-2): 103-114
— A stochastic description of wet and dry spells in terms of an effective number of days
(De Bruin, H. A. R.) 45(1-2): 91-99
— Constant-rainfall infiltration
(Kutilek, M.) 45(3-4): 289-303
— Daily flow model based on rainfall occurrences using pulses and a transfer function
(Kottegoda, N. T., *et al.*) 47(3-4): 215-234
— Effective rainfall estimation
(Mls, J.) 45(3-4): 305-311
— Rainfall stormflow analysis to investigate spatial and temporal variability of excess rainfall generation
(Clark, R. D. S.) 47(1-2): 91-101
— The distribution of hydrologically effective rainfall incident on sloping ground
(Sharon, D.) 46(1-2): 165-188
— The estimation and distribution of storm movement and storm structure, using a correlation analysis technique and rain-gauge data
(Marshall, R. J.) 48(1-2): 19-39

hydrology—cycles

evaporation: Assessment of the quality of generalized wind functions in Penman's equations
(Stigter, C. J.) 45(3-4): 321-331
— Evaporation from a sphagnum moss surface
(Nichols, D. S., *et al.*) 48(3-4): 289-302
evapotranspiration: Evaporation from vegetation in landscapes developing secondary salinity using the ventilated-chamber technique; II; Evaporation from Atriplex plantations over a shallow saline water table
(Greenwood, E. A. N., *et al.*) 45(3-4): 313-319
water balance: Spatial variability of infiltration in a watershed
(Sharma, M. L., *et al.*) 45(1-2): 101-122

hydrology—instruments

manometers: Automatic measurement of soil-water pressure using a capacitance manometer
(Thony, J. L., *et al.*) 46(1-2): 189-196

hydrology—methods

electrical methods: An automatic electrical resistance soil-moisture measuring system
(Williams, T. H. L.) 46(3-4): 385-390
graphic methods: Interpretation of recession flow
(Anderson, M. G., *et al.*) 46(1-2): 89-101
mathematical methods: A micro-hydrology computation ordering algorithm
(Croley, T. E., II) 48(3-4): 221-236
— A non-Gaussian Markovian model to simulate hydrologic processes
(Valadares Tavares, L.) 46(3-4): 281-287
— A predictor-corrector alternating-direction implicit method for two-dimensional unsteady saturated-unsaturated flow in porous media
(Hornung, U., *et al.*) 47(3-4): 317-323
— An approximate solution to the advection-diffusion equation as applied to an estuary
(Wang, S. T., *et al.*) 48(3-4): 251-268
— Autorun analysis of hydrologic time series; discussion
(Chander, S., *et al.*) 45(3-4): 333-339
— Determining operating policies for a water resource system
(Dagli, C. H., *et al.*) 47(3-4): 297-306
— Maximum-likelihood estimation of the general extreme-value distribution parameters
(Otten, A., *et al.*) 47(1-2): 187-192
— Muskingum method revisited
(Strupczewski, W., *et al.*) 48(3-4): 327-342
— On reservoir reliability
(Pegram, G. G. S.) 47(3-4): 269-296

— On subsurface drainage of transient recharge
(Singh, R. N., *et al.*) 48(3-4): 303-311
— Regional drought and flood frequency analysis; theoretical consideration
(Sen, Z.) 46(3-4): 265-279
— Some notes on Muskingum method of flood routing
(Singh, V. P., *et al.*) 48(3-4): 346-361
— Stochastic generation of temperature and solar radiation data
(Nicks, A. D., *et al.*) 48(1-2): 1-17
— Translatory characteristics of the Muskingum method of flood routing; discussion and reply
(Strupczewski, W., *et al.*) 48(3-4): 363-372
— TRRL and unit hydrograph simulations compared with measurements in an urban catchment
(Williams, D. W., *et al.*) 48(1-2): 63-70
statistical methods: A generalized probability density function for double-bounded random processes
(Kumaraswamy, P.) 46(1-2): 79-88
— An autocorrelation approach for parameter estimation of fractional order equal-root autoregressive models using hypergeometric functions
(Spolia, S. K., *et al.*) 47(1-2): 1-17
— On the occurrence and importance of Paretian-tailed distributions in hydrology
(Ochoa, I. D., *et al.*) 48(1-2): 53-62
— The extreme-value type-1 distribution and the principle of maximum entropy; discussion and reply
(Huynh Ngoc Phien, *et al.*) 47(3-4): 385-388
— The preservation of skewness in linear disaggregation schemes
(Todini, E.) 47(3-4): 199-214

hydrology—rivers and streams
drainage basins: A practical model for linear and nonlinear runoff
(Rogers, W. F.) 46(1-2): 51-78
floods: A generalized approach to kinematic flood routing
(Smith, A. A.) 45(1-2): 71-89
models: Adaptive Fourier analysis of periodic-stochastic hydrologic sequences
(Sen, Z.) 46(3-4): 239-249
— Analysis of hydrological recession curves; discussion
(Martinec, J.) 48(3-4): 373
— Gamma synthetic hydrographs
(Croley, T. E., II) 47(1-2): 41-52
— Simulation of the effects of transpiration losses from the unsaturated zone on seepage from a soil slope
(Kilpatrick, P. A.) 46(3-4): 301-309
— Stochastic synthesis of hydrologic data based on concepts of pattern recognition; I, General methodology of the approach
(Panu, U. S., *et al.*) 46(1-2): 5-34
— Stochastic synthesis of hydrologic data based on concepts of pattern recognition; III, Performance evaluation of the methodology
(Panu, U. S., *et al.*) 46(3-4): 219-237
— Theoretical relations between different flood-routing and runoff models used in urban hydrology
(Thibault, S., *et al.*) 48(3-4): 313-326
streamflow: A continuous streamflow model
(Pegram, G. G. S.) 47(1-2): 65-89
— A stochastic model from daily streamflow
(Kelman, J.) 47(3-4): 235-249
— Adaptive real-time forecast of river flow-rates from rainfall data
(Bolzern, P., *et al.*) 47(3-4): 251-267
— Limited confidence in confidence limits derived by operational stochastic hydrologic models; discussion and reply
(Stedinger, J., *et al.*) 47(3-4): 377-383
— Stochastic generation of monthly flows for ephemeral streams
(Srikanthan, R., *et al.*) 47(1-2): 19-40

hydrology—seepage
measurement: Field measurement of seepage and evapotranspiration rate for a soil under plant cover; a comparison of soil water balance and tritium labeling procedure
(Kreutzer, K., *et al.*) 48(1-2): 137-146

hydrology—snow
measurement: The effect of snow drifting on gamma snow survey results
(Cork, H. F., *et al.*) 48(1-2): 41-51

hydrology—surveys
Bermuda: Hydrology of small oceanic islands; utility of an estimate of recharge inferred from the chloride concentration of the freshwater lenses
(Vacher, H. L., *et al.*) 45(1-2): 21-37
England: Chemical yields in runoff, and denudation in a small arable catchment, East Devon, England
(Foster, I. D. L.) 47(3-4): 349-368
— Factors affecting cost optimisation of groundwater development schemes for river regulation
(Birtles, A. B., *et al.*) 48(3-4): 197-219
— Rainfall interception in a forest stand estimated from grassland meteorological data
(Pearce, A. J., *et al.*) 46(1-2): 147-163

— The interpretation of tritium in the Chalk unsaturated zone
(Foster, S. S. D., *et al.*) 46(3-4): 343-364
Godavari River: Chemical and sediment mass transfer in the Godavari River basin in India
(Bikshamaiah, G., *et al.*) 46(3-4): 331-342
Great Britain: Comparative estimates of interception loss from three coniferous forests in Great Britain
(Gash, J. H. C., *et al.*) 48(1-2): 89-105
Iraq: Five letters from and to Hammurapi, King of Babylon (1792-1750 B.C.), on water works and irrigation
(Neumann, J.) 47(3-4): 393-397
Italy: The measurement of suspended sediment transport in natural streams using automatic radioisotope gauges
(Tazioli, G. S.) 47(1-2): 173-185
Kentucky: Characterization and models of watershed storage
(Rao, A. R., *et al.*) 45(3-4): 253-277
Lake Okeechobee: Use of Landsat data to improve the water budget computation in Lake Okeechobee, Florida
(Shih, S. F.) 48(3-4): 237-249
Manavgat River basin: Karstic spring recession hydrograph and water temperature analysis; Oymapinar Dam Project, Turkey
(Karanjac, J., *et al.*) 45(3-4): 203-217
Maritime Provinces: Stochastic synthesis of hydrologic data based on concepts of pattern recognition; II, Application of natural watersheds
(Panu, U. S., *et al.*) 46(3-4): 197-217
Northwest Territories: Hydrology of the Nahanni karst, northern Canada, and the importance of extreme summer storms
(Brook, G. A., *et al.*) 46(1-2): 103-121
River Exe: The spatial dimension in the interpretation of stream solute behaviour
(Walling, D. E., *et al.*) 47(1-2): 129-149
Shoalhaven River: Land-use hydrology; Shoalhaven, New South Wales
(Aston, A. R., *et al.*) 48(1-2): 71-87
Skerne River: A note of the performance of A ^{82}Br radioactive tracer in the River Skerne, England
(Hamill, L.) 47(3-4): 307-315
South Africa: The effect of afforestation with Eucalyptus grandis Hill ex Maiden and Pinus patula Schlecht. et Cham. on streamflow from experimental catchments at Mokobulaan, Transvaal
(Van Lill, W. S., *et al.*) 48(1-2): 107-118
Turkey: Critical drought analysis of periodic-stochastic processes
(Sen, Z.) 46(3-4): 251-263
Victoria: The North Maroondah Experiment pretreatment phase comparison of catchment water balances
(Langford, K. J., *et al.*) 46(1-2): 123-145
Wales: Reservoir effects on sediment yield
(Grimshaw, D., *et al.*) 47(1-2): 163-171
— Source identification for suspended sediments
(Grimshaw, D., *et al.*) 47(1-2): 151-162
— Welsh floodplain studies; II, Application of a qualitative inundation model
(Lewin, J., *et al.*) 46(1-2): 35-49
Wye River: The chemistry of the River Wye
(Oborne, A. C., *et al.*) 45(3-4): 233-252
Yampa River basin: Effective and bankfull discharges of streams in the Yampa River basin, Colorado and Wyoming
(Andrews, E. D.) 46(3-4): 311-330

hydrology—techniques
tracers: Pyranine used as a fluorescent tracer in hydrology; pH effects in determination of its concentration
(Launay, M., *et al.*) 46(3-4): 377-383

India—hydrogeology
ground water: Estimation of recharge to the phreatic aquifers of the lower Maner Basin, India, by using the titrium injection method
(Athavale, R. N., *et al.*) 45(3-4): 185-202
hydrology: Chemical and sediment mass transfer in the Godavari River basin in India
(Bikshamaiah, G., *et al.*) 46(3-4): 331-342

Iraq—engineering geology
waterways: Five letters from and to Hammurapi, King of Babylon (1792-1750 B.C.), on water works and irrigation
(Neumann, J.) 47(3-4): 393-397

isotope dating *see* absolute age

isotopes *see also* absolute age

isotopes—bromine
Br-82: A note of the performance of A ^{82}Br radioactive tracer in the River Skerne, England
(Hamill, L.) 47(3-4): 307-315

isotopes—hydrogen
tritium: Environmental isotopes in a study of the origin of salinity of groundwater in the Mexicali Valley; discussion
(Durazo, J., *et al.*) 47(3-4): 391-392
— The interpretation of tritium in the Chalk unsaturated zone
(Foster, S. S. D., *et al.*) 46(3-4): 343-364

isotopes—ratios
stable isotopes: Mixing models and ionic geothermometers applied to warm (up to 60°) springs; Jordan Rift valley, Israel
(Mazor, E., *et al.*) 45(1-2): 1-19

isotopes—tracer experiments
sedimentation: The measurement of suspended sediment transport in natural streams using automatic radioisotope gauges
(Tazioli, G. S.) 47(1-2): 173-185

Israel—hydrogeology
ground water: Kinetics of chemical processes in a carbonate aquifer; a case study of water-rock interaction in the aquifer of western and central Galilee (Israel)
(Nadler, A., *et al.*) 45(1-2): 39-56
thermal waters: Mixing models and ionic geothermometers applied to warm (up to 60°) springs; Jordan Rift valley, Israel
(Mazor, E., *et al.*) 45(1-2): 1-19

Italy—hydrogeology
hydrology: The measurement of suspended sediment transport in natural streams using automatic radioisotope gauges
(Tazioli, G. S.) 47(1-2): 173-185

Jordan—hydrogeology
springs: Mixing models and ionic geothermometers applied to warm (up to 60°) springs; Jordan Rift valley, Israel
(Mazor, E., *et al.*) 45(1-2): 1-19

karst *see under* solution features *under* geomorphology

Kentucky—hydrogeology
hydrology: Characterization and models of watershed storage
(Rao, A. R., *et al.*) 45(3-4): 253-277

land use *see also* reclamation; *see also under* environmental geology *under* New South Wales

land use—urban planning
hydrology: A micro-hydrology computation ordering algorithm
(Croley, T. E., II) 48(3-4): 221-236
— Theoretical relations between different flood-routing and runoff models used in urban hydrology
(Thibault, S., *et al.*) 48(3-4): 313-326

mathematical geology *see also* automatic data processing

meteorology—storms
effects: Hydrology of the Nahanni karst, northern Canada, and the importance of extreme summer storms
(Brook, G. A., *et al.*) 46(1-2): 103-121
models: The estimation and distribution of storm movement and storm structure, using a correlation analysis technique and rain-gauge data
(Marshall, R. J.) 48(1-2): 19-39

meteorology—temperature
models: Stochastic generation of temperature and solar radiation data
(Nicks, A. D., *et al.*) 48(1-2): 1-17

meteorology—water
atmospheric precipitation: Rainfall interception in a forest stand estimated from grassland meteorological data
(Pearce, A. J., *et al.*) 46(1-2): 147-163
— The distribution of hydrologically effective rainfall incident on sloping ground
(Sharon, D.) 46(1-2): 165-188

Mexico—hydrogeology
ground water: Environmental isotopes in a study of the origin of salinity of groundwater in the Mexicali Valley; discussion
(Durazo, J., *et al.*) 47(3-4): 391-392

Middle East *see also* Iraq; Israel; Jordan; Turkey

New Brunswick—hydrogeology
hydrology: Stochastic synthesis of hydrologic data based on concepts of pattern recognition; II, Application of natural watersheds
(Panu, U. S., *et al.*) 46(3-4): 197-217

New South Wales—environmental geology
land use: Land-use hydrology; Shoalhaven, New South Wales
(Aston, A. R., *et al.*) 48(1-2): 71-87

Nigeria—hydrogeology
ground water: ^{14}C ages of confined groundwater from the Gwandu Aquifer, Sokoto Basin, northern Nigeria
(Geyh, M. A., *et al.*) 48(3-4): 281-288

North America *see also* Mexico

Northern Hemisphere *see also* Africa; Atlantic Ocean

Northwest Territories—hydrogeology
hydrology: Hydrology of the Nahanni karst, northern Canada, and the importance of extreme summer storms
(Brook, G. A., *et al.*) 46(1-2): 103-121

Nova Scotia—hydrogeology
hydrology: Stochastic synthesis of hydrologic data based on concepts of pattern recognition; II, Application of natural watersheds
(Panu, U. S., *et al.*) 46(3-4): 197-217

ocean circulation *see also under* oceanography *under* Atlantic Ocean

organic materials—experimental studies
tracers: Pyranine used as a fluorescent tracer in hydrology; pH effects in determination of its concentration
(Launay, M., *et al.*) 46(3-4): 377-383

oxygen—isotopes
O-18/O-16: Mixing models and ionic geothermometers applied to warm (up to 60°) springs; Jordan Rift valley, Israel
(Mazor, E., *et al.*) 45(1-2): 1-19

pollution *see also* reclamation; *see also under* environmental geology *under* England

pollution—water
surface water: An approximate solution to the advection-diffusion equation as applied to an estuary
(Wang, S. T., *et al.*) 48(3-4): 251-268

Portugal—hydrogeology
ground water: Study of the effect of ocean tides on a coastal carbonate aquifer in the Miocene of Algarve, Portugal
(Razack, M., *et al.*) 45(1-2): 57-69

radioactive dating *see* absolute age

reclamation—natural resources
soils: Analytical solutions for predicting solute movement and their interpretation in reclamation
(Gupta, S. K., *et al.*) 45(1-2): 133-148
— Evaporation from vegetation in landscapes developing secondary salinity using the ventilated-chamber technique; II; Evaporation from Atriplex plantations over a shallow saline water table
(Greenwood, E. A. N., *et al.*) 45(3-4): 313-319

regional geology *see* areal geology under the appropriate area term

remote sensing *see also* geophysical methods; *see also under* geophysical surveys *under* Florida

reservoirs *see also under* engineering geology *under* Great Britain; Turkey

reservoirs—storage
water storage: Determining operating policies for a water resource system
(Dagli, C. H., *et al.*) 47(3-4): 297-306
— On reservoir reliability
(Pegram, G. G. S.) 47(3-4): 269-296
— Range analysis for reservoir storage with independent inflows
(Phien, H. N., *et al.*) 47(1-2): 53-64

salt-water intrusion *see under* ground water

sedimentary rocks *see also* sedimentation

sedimentation—transport
stream transport: Chemical and sediment mass transfer in the Godavari River basin in India
(Bikshamaiah, G., *et al.*) 46(3-4): 331-342
— Chemical yields in runoff, and denudation in a small arable catchment, East Devon, England
(Foster, I. D. L.) 47(3-4): 349-368
— Effective and bankfull discharges of streams in the Yampa River basin, Colorado and Wyoming
(Andrews, E. D.) 46(3-4): 311-330
— Reservoir effects on sediment yield
(Grimshaw, D., *et al.*) 47(1-2): 163-171
— Source identification for suspended sediments
(Grimshaw, D., *et al.*) 47(1-2): 151-162
— The measurement of suspended sediment transport in natural streams using automatic radioisotope gauges
(Tazioli, G. S.) 47(1-2): 173-185

sediments *see also* sedimentation

seepage *see under* hydrology

slope stability *see also* geomorphology

soils—field studies
instruments: Automatic measurement of soil-water pressure using a capacitance manometer
(Thony, J. L., *et al.*) 46(1-2): 189-196
techniques: An automatic electrical resistance soil-moisture measuring system
(Williams, T. H. L.) 46(3-4): 385-390

soils—salinity
occurrence: Analytical solutions for predicting solute movement and their interpretation in reclamation
(Gupta, S. K., *et al.*) 45(1-2): 133-148
treatment: Evaporation from vegetation in landscapes developing secondary salinity using the ventilated-chamber technique; II; Evaporation from Atriplex plantations over a shallow saline water table
(Greenwood, E. A. N., *et al.*) 45(3-4): 313-319

soils—surveys
England: Chemical yields in runoff, and denudation in a small arable catchment, East Devon, England
(Foster, I. D. L.) 47(3-4): 349-368
— The interpretation of tritium in the Chalk unsaturated zone
(Foster, S. S. D., *et al.*) 46(3-4): 343-364
India: Estimation of recharge to the phreatic aquifers of the lower Maner Basin, India, by using the titrium injection method
(Athavale, R. N., *et al.*) 45(3-4): 185-202
Iraq: Five letters from and to Hammurapi, King of Babylon (1792-1750 B.C.), on water works and irrigation
(Neumann, J.) 47(3-4): 393-397

soils—water regimes
characterization: A descriptive model of the relationship between rainfall and soil water table
(Rennolls, K., *et al.*) 47(1-2): 103-114
— Assessment of the quality of generalized wind functions in Penman's equations
(Stigter, C. J.) 45(3-4): 321-331
— Calculation of water balance in the crop root zone by computer
(Sarma, P. B. S., *et al.*) 45(1-2): 123-131

— Field measurement of seepage and evapotranspiration rate for a soil under plant cover; a comparison of soil water balance and tritium labeling procedure
(Kreutzer, K., *et al.*) 48(1-2): 137-146
— Field measurement of soil hydraulic properties characterizing water movement through swelling Clay soils
(Bouma, J.) 45(1-2): 149-158
— Spatial variability of infiltration in a watershed
(Sharma, M. L., *et al.*) 45(1-2): 101-122
— Topography and hillslope soil water relationships in a catchment of low relief
(Anderson, M. G., *et al.*) 47(1-2): 115-128
drainage: On subsurface drainage of transient recharge
(Singh, R. N., *et al.*) 48(3-4): 303-311
— Response functions applied to a drainage system
(Sharma, T. C.) 45(3-4): 279-287
movement: A predictor-corrector alternating-direction implicit method for two-dimensional unsteady saturated-unsaturated flow in porous media
(Hornung, U., *et al.*) 47(3-4): 317-323
— Comparison of calculated and in situ measured unsaturated hydraulic conductivity
(Khosla, B. K.) 47(3-4): 325-332
— Constant-rainfall infiltration
(Kutilek, M.) 45(3-4): 289-303
— Effective rainfall estimation
(Mls, J.) 45(3-4): 305-311
— Simulation of the effects of transpiration losses from the unsaturated zone on seepage from a soil slope
(Kilpatrick, P. A.) 46(3-4): 301-309

South Africa—hydrogeology
hydrology: The effect of afforestation with Eucalyptus grandis Hill ex Maiden and Pinus patula Schlecht. et Cham. on streamflow from experimental catchments at Mokobulaan, Transvaal
(Van Lill, W. S., *et al.*) 48(1-2): 107-118

Southern Hemisphere *see also* Africa; Atlantic Ocean

springs *see also* ground water; *see also under* hydrogeology *under* Jordan; Turkey

thermal waters *see also under* hydrogeology *under* Israel

tritium *see also* deuterium; hydrogen

tritium—abundance
ground water: Environmental isotopes in a study of the origin of salinity of groundwater in the Mexicali Valley; discussion
(Durazo, J., *et al.*) 47(3-4): 391-392
pore water: The interpretation of tritium in the Chalk unsaturated zone
(Foster, S. S. D., *et al.*) 46(3-4): 343-364

Turkey—engineering geology
reservoirs: Karstic spring recession hydrograph and water temperature analysis; Oymapinar Dam Project, Turkey
(Karanjac, J., *et al.*) 45(3-4): 203-217

Turkey—hydrogeology
hydrology: Critical drought analysis of periodic-stochastic processes
(Sen, Z.) 46(3-4): 251-263
springs: Dumanli Spring, Turkey; the largest karstic spring in the world?
(Karanjac, J., *et al.*) 45(3-4): 219-231
— Karstic spring recession hydrograph and water temperature analysis; Oymapinar Dam Project, Turkey
(Karanjac, J., *et al.*) 45(3-4): 203-217

underground water *see* ground water

United Kingdom—economic geology
water resources: Factors affecting cost optimisation of groundwater development schemes for river regulation
(Birtles, A. B., *et al.*) 48(3-4): 197-219

United States *see also* the individual states and regions

Victoria—hydrogeology
hydrology: The North Maroondah Experiment pretreatment phase comparison of catchment water balances
(Langford, K. J., *et al.*) 46(1-2): 123-145

Wales—hydrogeology
hydrology: Reservoir effects on sediment yield
(Grimshaw, D., *et al.*) 47(1-2): 163-171
— Source identification for suspended sediments
(Grimshaw, D., *et al.*) 47(1-2): 151-162
— The chemistry of the River Wye
(Oborne, A. C., *et al.*) 45(3-4): 233-252
— Welsh floodplain studies; II, Application of a qualitative inundation model
(Lewin, J., *et al.*) 46(1-2): 35-49

water resources *see also under* economic geology *under* England; Florida; United Kingdom

waterways *see also under* engineering geology *under* Iraq

waterways—floods
flood routing: Muskingum method revisited
(Strupczewski, W., *et al.*) 48(3-4): 327-342
— Some notes on Muskingum method of flood routing
(Singh, V. P., *et al.*) 48(3-4): 346-361
— Translatory characteristics of the Muskingum method of flood routing; discussion and reply
(Strupczewski, W., *et al.*) 48(3-4): 363-372

simulation: A generalized approach to kinematic flood routing
(Smith, A. A.) 45(1-2): 71-89

Western Hemisphere *see also* Atlantic Ocean

Wyoming—hydrogeology
hydrology: Effective and bankfull discharges of streams in the Yampa River basin, Colorado and Wyoming
(Andrews, E. D.) 46(3-4): 311-330
